The Stellar Comfort Collection offers the most comfort of any lift recliner. Each model comes standard with the Stellar Comfort positioning technology, allowing the backrest and footrest to work independently to create positions that place the feet above the heart and reduce lower back pressure.

Zero Gravity

UltraComfort America proudly introduces StellarComfort, a new concept in positioning comfort. StellarComfort positioning technology allows for a greater range of positions at the touch of a button. These positions may help improve circulation, relieve back pressure and enhance comfort. Experience the difference of this unique motion technology available in multiple sizes.

\* See Customize Chart for dimension limits  
Sizes may vary depending on fabric, filling material, upholstery and carpet thickness.  
All measurements taken on concrete floor using levels and metal rulers.

### User-friendly feature of every UltraComfort recline chair:

Easy to use battery backup system. Each UltraComfort recliner has a battery backup system in the electrical transformer which operates on two 9 volt batteries. In the event of a power failure, the battery system will raise the chair from the reclined to the seated position. The batteries should be replaced after one use.

Positioning you for life.
